Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Introduction

Dear Distinguished Delegates and Guests,

The 2019 Eleventh International Conference on Graphics and Image Processing (ICGIP 2019) is held in Hangzhou, China during 12–14 October 2019. It was the eleventh year of the ICGIP conference. ICGIP 2019 was hosted by Zhejiang Gongshang University, (China); organized by the School of Computer and Information Engineering (SCIE) of Zhejiang Gongshang University (China); and co-sponsored by the College of Computer Science from Sichuan University (China), Ocean University of China (China), and the University of Portsmouth (United Kingdom).

ICGIP was the main annual Graphics and Image Processing conference aimed at presenting current research. The idea of conference was for the scientists, scholars, engineers and students from universities and industries all around the world to present ongoing research activities, and hence to foster research relations between universities and industries.

We would like to thank the authors for the high quality of the submissions. We are grateful to the reviewers for being responsive and thorough in such a short time frame. The creation of such a broad and high-quality conference program would not have been possible without their involvement. This event could also not have been a reality without the support of many individuals, organizations, and universities. We are grateful to the members of the ICGIP 2019 organizing committee for their help in handling the logistics and for their work to make this professional conference a success.

Once again, on behalf of the conference committee, we welcome you all to Hangzhou! We wish you a very pleasant stay in this beautiful city. And hope you will find the ICGIP 2019 experience a memorable one.

Zhigeng Pan
Xun Wang
